

INTUITIVE

Da Vinci Force Bipolar

With DualGrip technology

Added control.* Nonstop progress.**

Get a different level of grasping control throughout your case* with Force Bipolar and DualGrip technology.

Close surgeon collaboration aimed at increasing efficiency in da Vinci cases led to a design that features two distinct grip modes.

Stay focused on the surgical field and shift grip strength when you need to, instead of asking your assistant to switch in another grasper.

With the Force Bipolar in your toolkit, you can streamline setup and minimize workflow disruptions by reducing instrument exchanges.

* Compared to other da Vinci 8 mm instruments. Data on file at Intuitive. Available for the da Vinci X and / or da Vinci Xi surgical systems

** Nonstop progress refers to reduced instrument exchanges.

Take grasping control to a different level.*

Increase the strength of your grip seamlessly with DualGrip technology.

Simply switch the mode from "Default" to "Strong" using your foot pedal to get a stronger hold of the suture or tissue you need to handle, instead of interrupting the procedure to bring in a new instrument.

* Compared to other da Vinci 8 mm instruments. Data on file at Intuitive.

Be efficient.

Force Bipolar combines the abilities of two grasping instruments, which enables you to increase efficiencies¹ and your hospital to potentially save on instrument costs.²

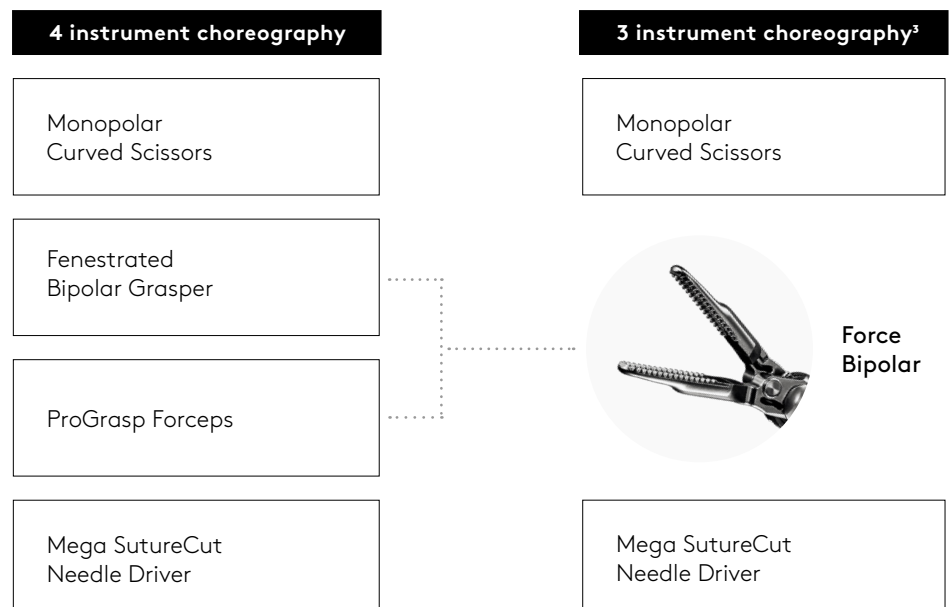

Now you can:

Simplify instrument selection with a grasper that covers multiple needs.

Minimize disruptions to your workflow by reducing instrument exchanges.

Potentially save time during your cases, delivering possible cost savings to your hospital.²

Potential savings per case from reduction in number of instruments.²

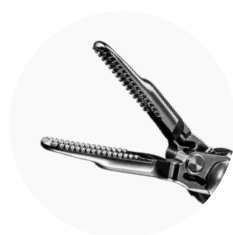

1. Time savings from decrease in number of instrument (enabled by multifunctionality and DualGrip Technology) exchanges and having less instrument to clean and sterilize.

2. Data on file at Intuitive

3. Applicable to certain procedures that can be performed with 3 instruments, i.e. ventral hernia. Data on file at Intuitive.

Part Number

Force Bipolar

1 unit (12 uses)

471405

da Vinci X and da Vinci Xi Surgical Systems

You can take advantage of Force Bipolar for:

- grasping
- retraction
- dissection
- bipolar coagulation of tissue

EndoWrist Force Bipolar

The EndoWrist Force Bipolar is intended to be used with compatible systems for endoscopic manipulation of tissue, including dissection, grasping, retraction, and bipolar coagulation of tissue.

The EndoWrist Force Bipolar is a class IIb medical device CE marked (CE 2460) under the European Medical Devices Regulation (EU 2017/745), manufactured by Intuitive Surgical, Inc. Refer to Instructions For Use before use.

EndoWrist Instruments

EndoWrist Instruments, including blunt and sharp endoscopic dissectors, scissors, scalpels, forceps / pick-ups, needle holders, endoscopic retractors, electrocautery and accessories are intended for endoscopic manipulation of tissue, including grasping, cutting, blunt and sharp dissection, approximation, ligation, electrocautery, suturing, and delivery and placement of microwave and cryogenic ablation probes and accessories.

EndoWrist Instruments are class IIa and class IIb medical devices CE marked (CE 2460) under the European Medical Devices Regulation (EU 2017/745), manufactured by Intuitive Surgical, Inc. Refer to Instructions For Use before use.

Individuals' outcomes may depend on a number of factors, including but not limited to patient characteristics, disease characteristics and/or physician/surgeon experience.

Some products, features or technologies may not be available in all countries. Please contact your local Intuitive representative for product availability in your region. Refer to the product specific User Manual for indications, contraindications, warnings and other product information.
